Release note on v3.9.101 – v3.9.103	2
Release note on v3.7.12	2

Release note on v5.0.43

New features

- Added the "Skip preheating and start cooking" button on open-lid cooking (Stir Fry low, medium, high and Stew low, medium, high
- Added a "Skip synchronization" button for synchronization after a wifi update (you can still trigger synchronisation manually using dedicated card in product parameters)
- In my fridge: special characters are now managed during the ingredient search

Patches

- Fixed an issue accessing the booklets after several months of product inactivity
- Several fixes on synchronisation feature
- Big improvement on product latency when wifi connexion is established
- Improved keyboard latency
- Changed text on reinitialisation screen for clarity
- The button to change the number of servings is no longer displayed when there is only one choice.

Release note on v3.31.38

New features

- Synchronization feature is available: your library and recipe booklets now can synchronize their recipes so that you can still have them available and up-to-date even your Cookeo Touch is offline.
- Demo mode is now accessible to deactivate in product parameters, just type 5555 code when requested to suppress Demo mode of product
- Adding new languages for Spain and Portugal

Patches

- Correction of application crash on some ingredient cookings
- No default choice when displaying cookie opt'in screens
- Correction on dashboard for pressure cookings so that time modification screen reflects real ongoing duration
- Correction of rare cases where product after electrical shortage was stuck on decompression screen
- Correction on some recipes where 'Bon appetit' screen did not displayed as it should
- Videos where played twice when pressing the play button twice
- Opened Possibility to lower cooking time on pressure cookings to 0 min instead of 1 minute previously
- Improvement of the display of the search filters
- Change of the cooking animations to display a Cookeo without the lid when the program needs no lid

Release note on v3.9.101 – v3.9.103

- Several small patches and experience improvements for users

Release note on v3.7.12

- Adding new languages for Belgium, Italia and Switzerland
